

Feature	Advantage	Benefit
BASHPLATE 3/8" plate in front of LEDs	Most vandal-resistant design available. Even 40 caliber bullets fired from point blank range could not penetrate the Bashplate™ and do massive internal damage to the sign.	Lower cost. Radarsign's driver feedback signs will keep working while other manufacturer's signs would have to be replaced.
3 sizes of faceplates available	Visibility	Effectiveness. With a faceplate size suitable for any speed range, Radarsign driver feedback signs provide an effective solution for slowing traffic down in any location from school zones to high speed traffic roads.
Super Bright Amber LEDs	Viewable from 500-1000 feet away depending on the model	Gives driver plenty of time to react and slow down.
Speed Alert with 2 speeds of flashing LEDs	Allows user to determine flash speed	Actively notifies drivers that they are exceeding the posted speed limit
Mini-SD Memory Card	Allows the radar speed sign to collect speed data on up to 500,000 vehicles	Data can be analyzed with StreetSmart™ traffic statistics software using graphs and tables to show the effectiveness of the sign in slowing traffic.
Display On/Off Mode & 4 Daily Timers	Enable radar speed sign to operate during user-defined times of day; Allow traffic data to be collected even when LEDs are off	Flexibility for various usages including school zones
Maximum Speed Cutoff for Display	Helps prevent unwanted high speed 'testing' of unit by thrill seeking drivers	Prevents accidents
AC, Battery, or Solar Power Models	Give you the most choices for powering your radar speed sign	Eliminates the environmental issues associated with stop signs, speed humps or speed tables including complaints, increased pollution, increased emergency response time, increased vehicle maintenance cost
Bluetooth™ Communication	Allows the wireless operation of the radar sign directly from your laptop PC without having to leave your vehicle; Allows you to download the data collected from the sign. Daily information can be retrieved in about 15 seconds!	Ease of operation.
Versatile Design	<p>SOLAR POWERED: The energy efficient design of the solar powered radar sign provides 24/7 operation using a small 40 watt solar panel.</p> <p>BATTERY POWERED: Using our locking pole mount brackets, our battery powered radar sign can be moved quickly and easily to other pole locations as needed.</p> <p>A/C POWERED:</p>	<p>Streamlined design offers an aesthetically pleasing look.</p> <p>Portability</p> <p>Provides permanent solution for traffic calming</p>
StreetSmart™ software (optional)	Allows you to format and report the vehicle data collected from any of our driver feedback signs.	The traffic calming effectiveness of the radar sign can be monitored on an ongoing basis.
